

# TOURISM WEBSITE

AK TRAVELS

**Name: Mohamed Afrosekhan .J**

## **Abstract**

This project “TRAVEL AND TOURISM MANAGEMENT” is used to automate all process ... Tour Management system is a dynamic website for tourism business. **Tourism** became a common topic while the level of **tourist** requirements increased dramatically

## **Description**

A tourism or travel website **serves as an information hub for prospective travelers planning a getaway**. Today, people travel for a range of experiences—babymoons, staycations, voluntourism or bleisure—you name it. So, provide as much relevant information as possible to help users plan their trips

## **MODULES:**

- **HOME**
- **TOURS**
- **PACKAGE**
- **BLOG**
- **ABOUT US**

## **SOFTWARES**

### **FRONTEND: HTML & CSS**

#### **INTRODUCTION**

##### **HTML:**

HTML stands for Hyper Text Markup Language. HTML is the standard markup language for creating Web pages. HTML describes the structure of a Web page. HTML consists of a series of elements. HTML elements tell the browser how to display the content.

##### **CSS:**

CSS stands for Cascading Style Sheets. CSS describes how HTML elements are to be displayed on screen, paper, or in other media. CSS saves a lot of work. It can control the layout of multiple web pages all at once. External stylesheets are stored in CSS files.

### **PLATFORM INDEPENDENT**

Html & Css is platform independent as it can run without the help of any platforms or software. Html & Css codes are usually used in making website, which is now the best source for information and internet marketing.

## **FEATURES OF HTML PROGRAMMING LANGUAGE**

It is a very easy and simple language. It can be easily understood and modified.

- It is very easy to make an effective presentation with HTML because it has a lot of formatting tags.
- It is a markup language, so it provides a flexible way to design web pages along with the text.
- It is platform-independent because it can be displayed on any platform like Windows, Linux, and Macintosh, etc.
- It facilitates the programmer to add Graphics, Videos, and Sound to the web pages which makes it more attractive and interactive.
- HTML is a case-insensitive language, which means we can use tags either in lower-case or upper-case.

## **SOFTWARE REQUIREMENTS**

### **A.SYSTEM REQUIREMENTS**

- **Operating System** : windows
- **Technologies Used :**
  - Front End : HTML & CSS

### **Software Requirements:**

- Html
- Browser
- Windows

## B.SOURCE CODE
